The fix The fix for Macintosh users is the same as in Office for Windows look to the operating system.. Even if you know the ASCII or Unicode number for the character, you can't type it in as you can in Office for Windows.. If Word for Mac supported the full range of characters, the subset feature would let you jump to a group of characters.. The Keyboard Shortcut option is no help either, because it's limited to making shortcuts from the symbols visible on the dialog.
